

Liquid Chromatograph Mass Spectrometer

LCMS-8045

Best-in-class sensitivity

INTRODUCTION

NexusCARE is proud to offer precise therapeutic drug monitoring (TDM) services utilizing USFDA approved LC-MS/MS technology. Our comprehensive analysis encompasses Tacrolimus, its metabolites, and other immunosuppressants such as Cyclosporine, Everolimus, and Sirolimus. Committed to proactive patient management, we promptly notify healthcare professionals of extreme values for timely intervention.

KEY FEATURES

Comprehensive Analysis:

Our service provides simultaneous quantification of tacrolimus, metabolites, and other immunosuppressants, ensuring a holistic approach to therapy management.

High Sensitivity and Specificity:

Utilizing advanced LC-MS/MS technology, we ensure exceptional accuracy even at low concentrations, guaranteeing reliable results.

Fast Turnaround:

Streamlined workflows enable prompt result delivery, facilitating timely treatment adjustments for improved patient outcomes.

Custom Reporting:

Tailored interpretations and recommendations support personalized treatment strategies based on individual patient needs.

BENEFITS FOR HEALTHCARE PROFESSIONALS:

Optimized Therapy:

Precise TDM facilitates dosage adjustments to maintain therapeutic levels and minimize adverse effects across multiple immunosuppressants.

Early Intervention:

Proactive monitoring enables the early detection of suboptimal drug levels or interactions, allowing for timely intervention and improved patient outcomes.

Enhanced Communication:

Our standard practice includes notifying healthcare professionals of extreme values, ensuring collaborative decision-making for patient care.

CONCLUSION

NexusCARE is your trusted partner for LC-MS/MS-based TDM services, offering comprehensive analysis and proactive communication to elevate patient care in immunosuppressant therapy management.
